Apropos of our use of headings of class and order to precede all articles, we have heard some criticism to the effect that it was an affront to the intelligence of the reader to inform him of such an "obvious" matter. We are, however, recently in receipt of a communication signed by the Secretary of the Smithsonian Institution on behalf of the international catalogue of scientific literature, requesting the class, order and family to which should be referred a short paper published by us in this JOURNAL before the above custom was adopted. If the compilers of bibliographies go to the trouble of correspondence with authors before they can list their works, it needs no further proof of the usefulness of our headings.
